

Draft amendment of the Ministerial Notification No.2943 of the Ministry of Agriculture, Forestry and Fisheries of 2013

Considering intention of fertilizer producers to make use of zeolite for designated combined fertilizers, which is found to have anti-caking effect, restriction of anti-caking material available for designated combined fertilizers is to be deregulated as follows.

The following material is added to the list of anti-caking material available for designated compounded fertilizers.

Zeolite (to be 3% or less of the total weight)
